

THE BRAND

The Ecotechnics brand, international point of reference for the maintenance of air conditioning systems in the automotive industry, differs through its constant research for improvements and the efficiency of its technical solutions for the benefit of the workshop. Products and service are innovative, safe, ecological and easy to use, providing the workshop with the best possible equipment.

The very fast technological development in the automotive industry requires growing performance and efficiency of the A/C systems and of its competent maintenance. To meet these growing workshop needs and opportunities, Ecotechnics' corporate program focus on three priorities:

1. Ensure the highest possible technological performance and reliability of the products. Products and technology must offer the user best benefits.
2. Optimization of logistics and technical service before and after the purchase. The advice and all technical support up to the maintenance, have to be fast, simple and precise.
3. Take care about the most competent network of selected partners in the world: competent professional dealers follow mutual agreements and strive for a long-lasting relationship with Ecotechnics.

"The Ecotechnics team steadily worked hard to capture the current leadership position. Constant improvements upgrade further reliability and technical performance of our products. The international distribution network is optimized and many business relationships persist and continue to grow. The grown company organization now has extraordinary expertise in engineering, development, production, sales and marketing.

This positive development has been recognized and the active role of the Ecotechnics brand in the Snap-on group is opening new horizons. The future development of Ecotechnics has been intensified by the synergy of these resources, the know-how and the organizational structure.

I am proud now to continue with my team the mission of Ecotechnics: be a strong partner in the market, actively requested by commercial partners and professional users."

Alberto Bechis, Vice President Snap-On Climate Solutions srl
