INSIGHTS FROM SNAP-ON CLIMATE SOLUTIONS SRL

@ PERIODICAL NEWS EDITION – THE INFORMATION DRIVEN BUSINESS SUPPORT

2023 FEBRUARY

Information supported Customer Connection

Constantly updated information flow is undeletable for a good customer connection. With the desire to better share relevant and valuable information with our network of customers and colleagues, Snap-on Climate Solutions starts with a periodical edition of Newsletters.

Information is not just part of competent know how, but enables deeper connection due to storytelling as a fundamental human experience. Storytelling unites people and drives stronger connections, highly meaningful in any business relationship.

We do not sell just products, we pay attention on relationships done by stories building up our brands and help our partners to engage consumers in a fragmented media world.

CATALOGUE 2023

The new catalogue 2023 is available.

“The workers in the workshop are the ‘daily heroes’ who make things work. The company puts them first, listening carefully to their needs and striving to offer always the most efficient and friendly solutions.”

Snap-on Climate Solutions is pleased to present the new Ecotechnics catalogue 2023. The brand image further evolves and comes closer to the users in the workshop as the absolute main player in brand’s consumer communication.

All stations are displayed inside the workshop, attracts attention and interest of our target group and informs clearly about the complete product range and technical details.

The catalogue includes both air conditioning products and the new program of **ATF MOOVETECH**.

Please have a look on-line on our homepage www.ecotechnics.com where you’ll find the pdf download in 6 languages. Printed copies are available and sent out to customers.

ÖBB Power for large systems

Snap-on is very pleased to inform Österreichische Bundesbahnen ÖBB (the Austrian railway company) has elected **Sun KOOLKARE HD-S** for their Technical Centers.

The **KOOLKARE HD-S** is Sun’s special product for the refrigerant R134a. The technical characteristics allow to manage large systems such as those of buses or trains.

“The large capacity 40 l internal cylinder, the strong gear pump, 170l/min vacuum pump and hermetic compressor of this product represent best solutions for our needs.” Undeletable feature is also the automatic test of the A/C system under pressure with nitrogen or hydrogen/nitrogen mixture.

DATABASE UPDATE 2023

Database update for completely automatic workflow

The Database update 2023 is available.

Only an updated database enables completely automatic workflow of the A/C station and avoids time-wasting research for refrigerant quantities.

The new database is updated with most recent new models and updated information. The complete list of vehicles included in the 2023 database is available in AC-Servic24.

An **information flyer** is available on-line or by a click on following flag for different languages

Business by service!

Everything’s ready for the new year?

Workshop’s equipment needs care and maintenance. Prepare now the new season.

Workshop’s equipment needs care and maintenance (including software & database updates). Please remember to set now the action plan for your maintenance program during the winter months. Carefully prepared equipment will guarantee professional and efficient service in the workshop during the season.

Further, a winter maintenance program represents precious contribution on balanced workloads for any service technician. On our homepage you can find a helpful information flyer. Or [click here](#)
