CLEANING AND OIL REPLACEMENT FOR AUTOMATIC TRANSMISSION

EN

FOR AUTOMATIC TRANSMISSION CLEANING AND OIL REPLACEMENT

UNIQUE, EFFORTLESS, COMPREHENSIVE

Smart-Drain system

This is the most comfortable, fast, safe and clean method to handle the used fluid. The recovered oil dripped from the pan is automatically weighed. The height of station's drain pan is adjustable. The asymmetrical shape adapts it to many different gearboxes.

2 large fine filters

Protect all internal components of the station, avoid the need of maintenance with high filtration capacity preventive filtration of the gearbox circuit during the cleaning phase. For both directions (1 and 2) a dedicated filter.

High performing Manifold

Strategic placement of compact valves and implementation of anti-pressure drop measure ensures the best performance. With Generous diameter and smooth passages for oil flow to prevent pressure drops resulting in increased speed and constant oil flow. This is particularly advantageous for large engine' d vehicles, sports, vintage and American cars.

Multi-brand new oil tank

New oil tank designed to easily accommodate different sizes and multi-brands.

Discharge used oil by compressed air

Clean, Easy, Fast: no pump necessary, no maintenance or repair. Using highly professional emptying operations we have eliminated any need to remove of the used oil tank making it cleaner, faster, and easier.

Third scale for cleaner

Highest accuracy and precision compared to other manufactures. Using a scale avoids the risk of the pump sucking air while injecting additive and removes the constant need to purge the pump.

High quality connectors

Anti-splash, anti-flap, easy to handle

Software: automatic and intuitive

Continuous total control software. During the whole process of cleaning, oil replacement and substitution of pan and/or filter, the software workflow never requires running engine in critical moments. The navigation is intuitive. The user is perfectly guided. Most suitable parameters are recommended but not mandatory and the user is always free to define preferred service settings.

UNIQUE

Our station stands out as the ultimate choice in the market. By integrating automatic workflows, software-guided procedures, and comprehensive databank. Our dedication to robustness and resistance ensures minimal maintenance making our station truly exceptional.

EFFORTLESS

With its automatic and intuitive controls, it incorporates the most competent workflow settings, carefully crafted by experienced specialists. Users are seamlessly guided through all settings, ensuring an effortless and efficient experience.

COMPREHENSIVE

The Database contains more than 20.000 vehicles. Encompassing more than 90% of all vehicle models manufactured from 2000 onwards. With immediately available adapters, as well as those obtainable on request, we ensure a comprehensive coverage for all connections.

ATF MOOVETECH

Name - Description ATF MOOVETECH Certifications CE Display Touchscreen 7" App smartphone Wi-Fi Software update USB Flash Drive	
Display Touchscreen 7" App smartphone Wi-Fi	
App smartphone Wi-Fi	
Software update USB Flash Drive	
Type of service Automatic	
Detection of flow direction Automatic	
Cross-contamination Completely prevented	
Self-priming Introduce new oil type after flushing out residue of previoused oil type	ously-
Valves for oil change Automatic	
Used oil emptying valve Manual	
Used oil container Fixed container, 25 liters	
New oil container Removable plastic canister, 20 liters	
New and used oil scale resolution 5 gr, load cell	
Oil cleaner additive containers 2 liters	
Oil cleaner additive scale resolution 5 gr, load cell	
Oil cleaner additive injection Automatic	
Bowl for carter oil recovery Provided - SMART DRIP system	
Oil filtering 2x ultra-fine filters	
Pump High flow rate pump (up to 9 liters per mininute)	
Used oil tank emptying With compressed air, easy emptying	
Service pipes 2x 3 meters	
Pipe for emptying used oil 1,5 meters	
Top-up From 1 liter bottle or canister	
Oil quality indicator By transparent illuminated tubes	
Thermal printing Standard	
Database Displays accurate positioning of connections	
Languages 27 languages	
Wi-Fi Standard	
Dimensions 72 x 73 x 108 cm, 80 kg	
Dimensions with packaging 76 x 70 x 137 cm, 95 kg	
Voltage 230Vac, 50/60 Hz	
Power cord cable Locking plug as standard	
Working ambient temperature range 5 - 55 °C / 10-95% humidity	

Focus on the functions of ATF MOOVETECH

CLEANING OF THE AUTOMATIC TRANSMISSION

During the cleaning cycle, the ATF MOOVETECH injects the special additive into the circuit to clean gently deposits and residues in a chemically controlled way. Newly developed ATF lubricants are products strongly additivated to adapt to the variation of temperatures or alternating loads. Despite this, the simple replacement of the oil does not prevent over time from the formation of harmful deposits.

REPLACEMENT OF OIL

The ATF MOOVETECH station manages the oil replacement completely automatically.

Starting the engine of the car with the ATF MOOVETECH connected to the gearbox, the two ultra-fine filters installed will clean the oil in circulation at the entrance of the station, thus eliminating metal and solid particles of any nature.

Why is ATF service an important issue?

Production of vehicles with automatic transmission is strongly growing and the behavior for gearbox maintenance is changing. Manufacturers recommended "no maintenance" in the past and automatic transmissions have been considered "life time". Today maintenance with regular cleaning and oil replacement is upcoming. Standards for gearbox connections and procedures are going to be implemented.

What is the benefit to carry out ATF service?

Maintenance of automatic transmission is recommended for best gearbox efficiency, prevent and avoid repair, decrease energy consumption of the vehicle, keeps lower emissions and confers satisfactory, good and long-lasting driver experience.

What is the advantage of ATF service for the workshop?

LEVELKIT-ATF

ATF service becomes undeletable for any professional full-service workshop. Growing requests for ATF service represent important business opportunity for the workshop. Any ATF service is related to the use of consumables (oil, cleaner, additives) and generates additional turnover with high revenues. The ROI (return of investment) is fast.
