2024 MARCH

Accessories and options WORKSHOP SOLUTIONS SAFE & SUITABLE

A professional and comprehensive A/C service in the workshop requires, in addition to the A/C Station, adequate accessories, consumables, leakage control solutions and items for regular maintenance.

The **optional Gas Analyser** is among SCS's outstanding solutions to protect the station and the A/C system against contaminated refrigerants, to offer safety and environmental protection besides avoiding unexpected costs resulting from repair services due to contamination.

Further, organize regulated disposal of contaminated refrigerants is part of any responsible common sense and is also critical to the proper management of warranties.

The gas analyser detects the percentages of the different refrigerant components. The refrigerant to be analysed is taken with the specific sample hose (not with the service hose as usually adopted by other manufacturers!) thus avoiding possible contamination of the A/C station.

R1234yf: 0 % | R22: 0 % | Air: 0 %
R134a: 100 % | Hydrocarb: 0 %

The refrigerant sample is taken with the dedicated sample hose. The result gives percentages of refrigerant's components

Evolution crafted by experienced specialists
ATF
UNIQUE, EFFORTLESS,
COMPREHENSIVE

Unique

Our station stands out as the ultimate choice in the market. By integrating automatic workflows, software-guided procedures, and comprehensive databank. Our dedication to robustness and resistance ensures minimal maintenance making our station truly exceptional.

Effortless

With its automatic and intuitive controls, it incorporates the most competent workflow settings, carefully crafted by experienced specialists. Users are seamlessly guided through all settings, ensuring an effortless and efficient experience.

Comprehensive

The Database contains more than 20.000 vehicles. Encompassing more than 90% of all vehicle models manufactured from 2000 onwards. With immediately available adapters, as well as those obtainable on request, we ensure a comprehensive coverage for all connections.

The numerous events for the presentation and demonstration of the Snap-on Climate Solutions ATF program continue. Active involvement of distributors and hands-on with workshops confirm the uniqueness of the program in terms of software, hardware and the big current range of ATF adapters

2024 CUSTOMER CONNECTION

Keep it personal

The passion for customer connection shan't miss personal meetings. The endless number of sales events give the opportunity to meet and connect, to share professional knowledge and find out best solutions on workshop needs.

Keep it professional

There're more than 70 sales events among international and national fairs, regional and local events up to sales events "open doors" of our distributors. We're prepared with efficient sales support and professional organization of any sales event.

THIS MONTH

The **LKQ STAHLGRUBER exhibitions** are an excellent information platform for the vehicle repair industry with first-hand news. Exchange ideas with the best in the industry about innovations and experience live performances in a family atmosphere. We are looking forward to your visit!
