@ PERIODICAL NEWS EDITION – THE INFORMATION DRIVEN BUSINESS SUPPORT

2025 FEBRUARY

CATALOGUE 2025

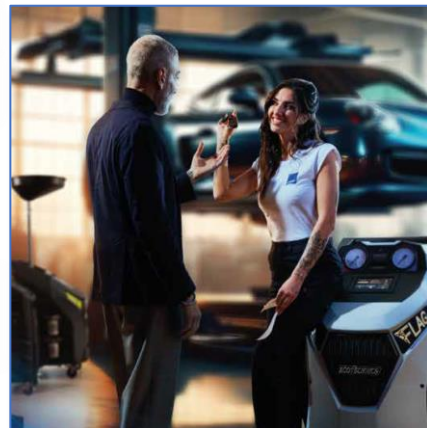

Snap-on Climate Solutions is pleased to present the Ecotechnics Catalogue 2025

"The workers in the workshop are the 'daily heroes' who make things work. The company puts them first, listening carefully to their needs and striving to offer always the most efficient and friendly solutions."

HAPPY DRIVER HAPPY WORKSHOP

The customer, picking up his car in the workshop, appears extremely satisfied with the good job the workshop has just performed. This is the happiest of situations a workshop aspires to. To do a good job, you need good equipment. You need Ecotechnics.

The catalogue is available in several languages on our homepage www.ecotechnics.com. For the Backstage video impressions of the photo-shooting: [please click here](#).

Priorities in 2025 edition are emotional entry, lightness, ease of reading and the clear and rational presentation of all useful information for salespeople and workshops. The catalogue provides an overview of Ecotechnics air conditioning stations, includes the new station for CO₂-systems ECO₂R744, informs on all accessories required for any professional air conditioning service and brings up-to-date the complete ATF program.

MESSEN

2025 FAIR CALENDAR Successful and award winning opening

Autzum Salzburg, Austria, AutoProf Gorinchem, The Netherlands and autoMESSN in Lillestrøm, Norway, opened this rich and award-winning fair calendar 2025.

In focus again the ATF up-to-date program and, in the category of diagnosis, maintenance and repair of Air Conditioning systems the single and dual gas Premium stations and, first of all, the future oriented solution for R744 refrigerant (CO₂). Great success of the new Ecotechnics ECO₂R744 has been confirmed: it's the A/C winner of the Innovation Award in AutoProf Gorinchem.
