MADRID, STUTTGART, LEIPZIG, ESSEN

Fantastic customer connection and leading protagonists confirm again efficient attraction of interest and sales results

Our protagonists are everywhere in full trend. Attraction, interest and concrete results of orders and sales have been confirmed again during the most recent trade fair events.

Highly distinctive and outstanding performance is demonstrated by the new A/C Station for R744 refrigerant (CO₂) ECO₂R744 (Ecotechnics) and ECO2KARE (Sun). Among mostly considered characteristics is the opportunity to serve also bis A/C systems (trains, busses) due to its strong vacuum pump. Step by step growth also confirmed by the ATF Station. A very promising outlook of development in this new future oriented business area. Consolidated success story also continues for the Premium range of A/C Stations, especially with ECK FLAG and ECK 4012 and ECK TWIN 12.
