Homo faber fortunae suae

The family of Snap-on® brands brought together best-in-class automotive repair products from across the industry.

Technological innovation and the **good quality of customer relationships** to **look to the future** together represent main key words of this fair edition.

Presentations, meetings and demonstrations attracted main attention on our Airconditioning for CO2 systems and the up-to-date ATF Program.

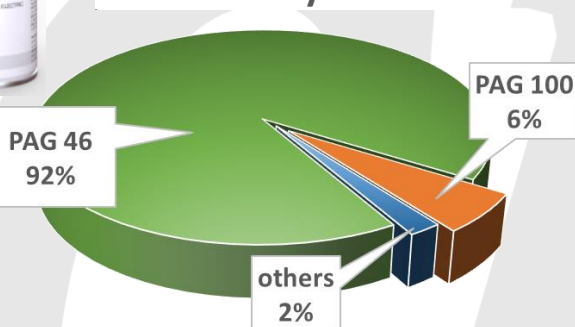

Some insight impressions of Ecotechnics' fair event [here by a click](#).

Most focussed range of A/C compressor oil and dye

3 products to cover more than 95% of workshop needs

PAG viscosity indication

For more information, see
Ecotechnics catalogue 2025 page 34

- Simple solution for the workshop
- Any product is "universal" for both HFO and R134a
- Mechanical and electric compressor
- Choice of bottles or hermetic cartridges
- Focused on the most popular PAG and POE standards

Looking for a smart, high quality and efficient solution to handle with oil and dye, Snap-on Climate Solutions studied a very competent, smart and focused range.

Among recommended types of oil, more than 90% are PAG oils, of which nearby all viscosity 100 or 46. Most frequently recommended POE viscosity is 80.

These 3 «universal» oils and dyes selected can cover nearby the complete market need. A solution easy to understand, easy to handle and to purchase.
