ATF adapters

The great range becomes even bigger

With the desire to offer a range of adapters as great and unique as our ATF machine, we created the widest range of ATF adapters to best focus and suit the European vehicle parc.

A constant work in progress to optimize best possible coverage. The actual range of 76 adapters and 21 oil level connectors, considered the widest available, is now further enriched by 10 additional adapters.

These new adapters are carefully selected to offer most efficient solutions on some popular models requiring ATF service and, further, to offer new tricky solutions on some specific models.

GAS ANALYSER

Ensuring the purity of refrigerant is critical to the proper management of warranties, to avoid system repair costs and to ensure the regular disposal of contaminated gas.

R1234yf: 0 %
R134a: 100 %

R22: 0 %
Hydrocarb: 0 %

Air: 0 %

The Gas Analyser represents a highly efficient solution with notable and distinctive advantages: the unit fits inside the station and does not take up external space, uses an external gas sample hose to exclude possible contamination of service hoses, detects the percentages of the different refrigerant components. The installation of the analyser is easy and takes less than 20 minutes.
