@ PERIODICAL NEWS EDITION – THE INFORMATION DRIVEN BUSINESS SUPPORT

2026 MARCH

## BEYOND THE PRODUCT: PEOPLE

*Every idea, every project, every result is born from the contribution of those who put passion, commitment and expertise into what they do every day. People are the beating heart of our business: it is thanks to them that we grow, innovate, and build the future.*

## DISCOVER THE NEW ECOTECHNICS CATALOGUE

The catalogue 2026 is available.

Not everything is immediately visible. And even if it were, it could be too much. It's better to guess first, to pick up a clue and switch on curiosity, the desire to discover and to understand. The cover page represents the invitation to open the door.

The image puts our people in focus with a selection of insights into our organization. The catalogue includes the entire up-to-date program A/C and ATF. Information and content are optimized to ensure best efficiency for your competent communication, presentation and sales activity.

## A WORLD OF ACCESSORIES: safe and suitable solutions

A professional service in the workshop requires further to the equipment than also accessories, consumables, leakage control solutions and items for regular maintenance. Ecotechnics offers a complete range of accessories and consumables to guarantee safe and suitable solutions. Accessories are presented in the catalogue from page 30 to 35 and on-line. Further, any individual product brochure on-line includes also the top recommended accessories for each station.

### Most focussed selection of A/C compressor oil and dye

- 3 standards = 95% of market requirements
- Simple solution for the user
- Any product is "universal" for both HFO and R134a, mechanical and electric compressor
- Choice of bottles or hermetic cartridges
- Most popular PAG46, PAG100 and POE80 standard

### Flushing kit

- Cleaning the A/C system with refrigerant
- Environmentally friendly: no solvents
- Very efficient thanks to the high washing speed
- Patented universal adapters for creating bypasses
- The amount of refrigerant can be defined by the user
- Fully automatic cycles: Time-saving and efficient

### Gas Analyser to handle the risk of contamination

- No external space necessary – integrated in the machine
- External Gas sample hose (not Service hoses!)
- Result gives % of refrigerant components
- Contamination of the station is excluded
- Easy to be installed (less than 20 minutes)

### Diagnosis Sight Glass

- Visual inspection of the refrigerant by running A/C system
- Visual inspection during recharge of internal tank
- Useful as a protective filter for AC stations in case of unsafe vehicle AC systems.

### Starterkit AEK006-2

The top recommendation for AC compressor oils and leak detection with UV light.

### HP Swift coupling (AEK231)

HD extension couplings for e.g. BMW, Ford and Volvo, the solution when access to the HD service connections is difficult.

### Manual injector

Fill compressor oil or dye manually via the LP connection by running AC system.

### Maintenance

- Most popular sizes 100 kg or 50 kg
- Individual spare parts or in Maintenance kits including filter and vacuum pump oil
