UK Garage & Bodyshop Event

3-4 June 2026, NEC

TRAINING NEW TECHNOLOGIES ATF SERVICE

The trend towards EV adoption continues to rise. 1 in 4 new cars being bought today offer a plug-in option, meaning there will be an ongoing need

for upskilling to meet the demands of the growing EV parc, alongside emerging technologies such as connected and autonomous vehicles and sophisticated automatic transmissions. Indeed, at this fair in Birmingham, there was once again great interest in **ATF Moovetech** demonstrations for the maintenance of automatic transmissions.

Main player on this event Ecotechnics' life demonstrations of the ATF program and the new A/C unit for CO2 systems.

Remarkable attraction by the new station **ECO₂R744** for CO2 air conditioning systems and the **ATF Moovetech**. Appreciated the outstanding strengths in hardware and in software equipped with the widest range of adapters and the comprehensive database.

expoMECÂNICA takes place every two years in even-numbered years and the next edition will be held in spring 2028. For more information:
