THANK YOU
FOR YOUR VISIT

Final report trade press: More exhibitors and visitors at Automechanika Frankfurt 2026

Automechanika Frankfurt 2026 impressed with an increase in the number of visitors, drawing over 112,000 trade visitors from 173 countries to Frankfurt for the five-day trade fair to visit 4,400 exhibitors from 80 countries.

Snap-on is proud of the results and the numerous meetings with partners from around the world.

Keep Your A/C Performing at Its Best

A properly maintained air-conditioning system keeps drivers comfortable and helps ensure reliable vehicle performance. Regular checks of refrigerant levels, filters, hoses, compressors, and connections can help identify problems before they become expensive repairs. Professional A/C servicing also ensures that the system operates efficiently throughout the year.

Most focussed selection of A/C compressor oil and dye

With just 3 standards, over 95% of market requirements are covered. Details in the catalog on page 30.

- Simple solution for the user
- Any product is "universal" for both HFO and R134a, mechanical and electric compressor
- Choice of bottles or hermetic cartridges
- Focused on the most popular PAG and POE standards

Little A/C Helpers

Several tricky solutions keep the A/C service in the workshop smart and fast. For example the HD extension couplings for several models especially from BMW, Ford and Volvo: the solution when access to the HD service connections is difficult.

Flushing the A/C system: the most friendly solution for your money and the environment

For cleaning the A/C system of components on the vehicle with refrigerant by an AC service station.

- Environmentally friendly because no solvents are used but only refrigerant
- Very efficient cleaning thanks to the high washing speed obtained with the vacuum in the tank
- Patented universal adapters for creating bypasses
- The amount of refrigerant can be defined by the user (washing a component rather than a system)
- Time-saving and efficiency thanks to the fast process and fully automatic cycles
